## S. G. TOBIN, M. P. ON OUR PROBLEMS

(Continued from last issue.)

One of the hindrances to immigration—and we heard it today in this House—is the speeches made by public men, men in high places telling the world that the people are leaving Canada, that industries are going to pieces and that all is wrong in this country. That is one of the greatest drawbacks to immigration. When men like the right hon. leader of the opposition make statements in this House they get to all parts of the world, and when the man in a foreign land reads the statement that the factories are closing down, how can you expect them to immigrate to Canada.

I am glad to notice that there is a reference to rural credit in the speech from the Opposition. I believe something can be done in this line which will be of real assistance to the agriculturist. An agriculturist cannot start without money. When he goes to the bank and asks for credit, they ask him, "How much have you got? What are your assets?" When he tells them he has none they refuse him credit and he cannot make a commencement. If he fails one year, the bank will not carry him a second year. I say to-day, the farmers of Western Canada—in fact in any other part of Canada—must have a longer term financial service than the people who follow any other calling. The hon. member for South Winnipeg (Mr. Rogers) in his speech was rather inclined to throw cold water on rural credits. He did not just say so; he pointed out the things that happened in Alberta and Saskatchewan and stated that if the Conservative party had been in power in those provinces such things could not possibly have happened. I do not think the hon. gentleman quite knows the history of the Conservative party in Alberta. They had a fair representation in the Alberta legislature in 1906 but their numbers diminished year by year until in 1921 there was only one conservative and he ran and was elected as an independent. I say that the Progressives ought to be careful in that province as well as here, because the Conservatives will take advantage of any division that may exist. I advise hon. members to be careful and not to be led away by any offer made to them by hon. gentlemen to their right. I have heard Progressives say that in some cases a competitive business will come along and give you something cheap in order to put the other fellow out of business. In 1921 the Conservatives supported the Progressives in Alberta, largely because they wanted to create a condition whereby they, the Conservatives, could come back. But under present conditions they say: "Now that our opponents are divided into Liberals and Progressives we will put men in the field, and may have a chance." They were not in the field in 1921, but now they are acting on the principle of "divide and conquer."

I understand there is going to be a tariff advisory board; it has been promised in the Speech. There should be ample scope for a board of this kind to function for the benefit and general advantage of the Dominion. The major part of the tariff burden is borne by the agriculturist, and in selecting the personnel of the board this should be significantly kept in mind. I heard the hon. member for South Toronto (Mr. Geary) telling us to make things dear. I wonder how hon. gentlemen from Toronto can get up in this House and make such statements. We understand he wants things dear, but there are very few in this Dominion, surely, who want that.

Mr. McGIBBON: Would the hon. member like to see bread dear? He does not answer.

Mr. TOBIN (Wetaskiwin): Some other hon. gentlemen kindly answered it for me.

Mr. TOBIN (Wetaskiwin): I was going to take up the question of the automobile and the duty paid on automobiles. They talk about cheap automobiles, but when I undertook to go into the question of facts and statistics the results seemed appalling against the consuming public and I did not carry the matter to its logical conclusion. I am taking a general view of the automobile question, so that others, on the basis of what I say may put the matter before the House in a more detailed way if I do not do so myself. This is the number of cars and trucks manufactured in Canada this year:

The number of Passenger Cars 139,311.  
The number of trucks 22,076.  
That makes about 156 cars in all, including trucks. I was trying to find out how much the people paid in duty, but the figures were so astounding that I did not go into them as far as I might have. I found that 54,000 cars were exported, leaving 107,386 cars for local consumption this year. This is not an absolutely accurate statement; it is simply a general view of the matter and fairly accurate. I took it in this way: Supposing these cars sold for \$1000 each—although that is too low; the figure would be nearer to \$1500—and—supposing for simplicity the number of cars was 100,000 instead of 107,386. That would make a selling price of \$100,000,000. The duty is 25 per cent, but let us call it 30 per cent because luxury and sales taxes enter into the question. Thirty per cent of \$100,000,000 is \$30,000,000; therefore it cost the people \$30,000,000 for duty, let us say, because while they do not actually pay that as duty, the price is

raised by the amount of the duty. Some hon. members say: Why should they not pay these cars at home? Look at the employment that is given to Canadian workmen. I found out that counting all the labourers, clerks and stenographers, there were over 5,000 employees engaged in this industry, according to the 1924 Year Book. I think I will stop right there, because this is a general statement. If it costs the country \$30,000,000 to keep 5,000 people employed, hon. members can figure on from that where it will lead. If you go to the United States you can buy a \$2500 car for \$750 less than you can buy it here and a \$4,000 car for \$1,500 less than you can buy it here. To-day the car is a utility; the people require cars, and I ask hon. members, why should they have to pay such tremendous duties when Canadian manufacturers are selling 54,000 cars abroad annually? If they can sell abroad in competition with the world, why can they not sell at home without such a huge duty? I think an hon. gentleman who spoke said that money was lost on their export. If they lose on export they charge the home consumer enough additional to enable them to sell to other countries at a loss, and we have to pay for the benefit of others.

I am glad to see the government has come down with a sound policy of promoting outside markets. The more bidders we have for any commodity we raise in this country, the better. That is the Liberal policy, as opposed to the policy of "retaliation"—a word that has been used frequently in the House in the course of this debate. Retaliation means that someone else must take the first step. When they take a brick off, you take a brick off; when they put a brick on, you put a brick on. In such a policy we do not require a tariff board; Washington will set our pace for us; just retaliate—do what they do. I wonder whether these hon. members would take off all the bricks on farm implements which the United States allow free into their country? But they do not wish to talk about those things; they want us to forget all about them. Home markets" is the slogan of the Conservative party, but a country can have home markets only in proportion to its population. In regard to home markets, let me tell a story that was told in this House before by the former member for Red Deer, Dr. Michael Clark. Probably I will spoil it in the telling, but this is about it. He said that this question of home markets put him in mind of an eagle sitting on a stump. Times were hard but she spied a lizard down below, and hopping down, bit the tail off the lizard and ate it. She went back to the stump and with this nourishment laid an egg. Then the lizard came along and ate the egg and grew its tail again, the eagle went down and bit the tail off the lizard, and so on. Mr. Clark said: "This is home markets. You cannot get rich on that sort of thing, and that is what the Conservative party wants to have."

Grading of grain was referred to yesterday by an hon. member. It seems to me that an important matter such as the grading of grain, a commodity that runs for millions of dollars, should be dealt with in a more scientific manner than it is being dealt with at the present time. The farmer when he sells his grain, thinks there is something wrong and he is not getting a fair deal. Such a situation is bad. He believes too much attention is given to colour. For instance, a little rain may fall on the grain and bleach it, and while it is as good as ever there is a tremendous cut in the price. That is bad and the grading should be more scientific. The grading of every other commodity is done more scientifically than the present grading of grain and no farmer thinks he is being used rightly. The grades are so complicated that farmers in many cases do not understand them and very few other people understand them. The graders do not always come to the same conclusion; and I will give the House some proof of this. In 1925 an attempt was made to find out how the grading compared east and west. No one suspected anything wrong, but the Vancouver Harbour Commission sent to the province of Alberta a man whom I assisted to find the samples of grain so as to send one carload east and one carload west of grain from the same field, cut on the same day, threshed on the same day, kept the same bin and handled in every respect in the same way. He brought three samples under those conditions, of two cars each, one car in each case being sent eastward and one westward. I want to read the result—not to show that there is anything dishonest, but to show that even the head graders do not agree on the grade. This letter is not long and I will read it:

(Continued next issue)

## Multiple-Cylinder Performance with Chevrolet Economy

—That's why hundreds of thousands of owners are praising today's Chevrolet, the greatest achievement in Chevrolet history.

Into the field of economical cars today's Chevrolet has brought exactly the smoothest, most comfortable, and most economical vehicle that has ever been the big reason for the buying of multiple-cylinder cars.

Imagine driving on a hill in a loaded car—with the motor turning so easily that you are almost unconscious of its operation. You can in the smooth Chevrolet.

Imagine cruising from 10 to 30 miles an hour—without a vibration or a bump in the road. You can in the smooth Chevrolet.

Imagine cruising from 10 to 30 miles an hour—without a vibration or a bump in the road. You can in the smooth Chevrolet.

**MRS. F. H. REED, A.T.C.M.**  
Teacher of Piano  
Honour Graduate, Toronto Conservatory of Music, Gold Medalist, Ontario Ladies' College, Pupil of de Motta and Schwarzenko, Berlin, Germany  
Formerly teacher Branksome Hall, and St. Margaret's College, Toronto, and Ontario Ladies' College, Whitby, also years of experience in private teaching.  
Specializing in principles of arm weight, touch and finger freeing. If desired, children may be taught one individual lesson a week and one class lesson, assisted by Miss Brenna Reed, using the principles of Fletcher Method for children, which Mrs. Reed studied in Buffalo, N.Y.  
Classes will open September 1st. Studios, Experimental Station, and home of Mrs. McCutcheon, in Lacombe.

**FOR SALE**  
Offers will be received at once for in Lacombe. E. Walter Simpson, Sec.—Treas. M. D. Crown, 369.

**GENERAL FIELD DAY, EXPERIMENTAL STATION, LACOMBE, SATURDAY, AUGUST 14th**  
Owing to wet weather many who were anxious to visit the Experimental Station at Lacombe were unable to do so on either August 4th or 7th. The wet, cool weather has delayed ripening and as very little cutting will be done for a week or more, another Field Day will be held on Saturday, August 14th.

The programme will commence at 1:30 p.m. with a short address on the work of the Experimental Station. This will be followed by a parade of cattle and horses and an hour's drive through the many avenues, and roads on the Experimental Station, visiting the different departments and stopping at the variety plots for a demonstration of how new varieties of grain are procured. Comparisons will be made of the 100 varieties of wheat; 80 varieties of oats and 45 of barley growing in the plots.

Whether from town or country you are interested in growing flowers, shrubs and hedges, gardening, bee-keeping, poultry raising, horses, cattle or swine and in grain growing. Visit the Dominion Experimental Station at Lacombe on Saturday, August 14th, bring your family and your friends; see the work of the different departments and ask questions. It will be an afternoon of profit and pleasure.

**HARVEST CARNIVAL**  
Plans are under way to hold the Elk's Harvest Carnival, September 20th to 28th inclusive, and judging from the preparations that are discussed by David Calder and his band of Bells, this will be the best event that has been held in the district for some time. The proceeds are to be used for the community welfare, promotion of a sports program and to assist the Elk's Band with new equipment. Handing out money and his music, Mr. Calder is holding a carnival and will have an entire new program to present to the music lovers of the district each night of the carnival. Other attractions will be on the program this year that will be new and novel. Full arrangements will be made later on the posters, also through the columns of the Western Globe. The committee in charge: E. C. Chapman, R. C. Jackson, David Hay, Wm. McDermott.

**ATTENTION ELKS**  
A regular meeting of the Lodge will be held in the Elk's Hall, Monday, Aug. 16th, and a full attendance is requested as matters of very great importance will be up for discussion. Also the Grand Lodge Report.

**DAVID CALDER**, Exalted Ruler.

Railway Street—Lacombe

**AT THE REX**  
Friday and Saturday

**YIPPIES**  
The only picture of its kind ever produced—showing the Canadian troops winning their way through at Ypres and Passendale. The most titanic struggle of the war. If you did not see it over there, see it here, and get an idea of what the boys were called upon to do and how nobly they did it. 2 full shows Saturday night. Admission 25c, 35c, and 50c, including tax.

**Tuesday Only**  
Johnny Hines in "The Live Wire. A 7 reel comedy drama of the usual Hines type. LUN DAVIS and his Arcadians of Gull Lake will play for this show—No increase in admission.

**BLACKFALDS**  
Rev. H. G. Smith of Red Deer will preach next Sunday on the United Church appointments, Blindman 11 a.m.; Spruceville 3 p.m.; Blackfalds 8 p.m. This being an exchange with the pastor here, who will take Rev. Smith's appointments. This exchange was arranged for two weeks ago, but the rain of that date prevented. The farmers of this district and surrounding country are this week erecting a larger scale near the loading platform of the C. P. R. where they can weigh all their produce. The L.O.B.A. lodge No. 653 of Lacombe entertained L. O. L. No. 1600 of the same town at a picnic at Jack-Pan Lake on Wednesday, and a real, royal, good natured time was spent

during the afternoon. A number of poverty races, a swim and an excellent spread of cake, and a short program of music were some of the unique features which delighted all.

Rain or not to rain seemed to be the problem last week in our budget, but one person stated that to mention the fact this week we sure had plenty. That however sounds good in a Province where at least some places are at times somewhat dry.

The residents of this town last week secured fifty per cent of the tax payers to sign a petition to the government, asking for a vote on Local Option. The petition has been received by the government and acted upon in quick dispatch, as the vote is decided upon to take place Sept. 6th.

Miss Mary Watson and brother Charles from Ponoka are visiting with Miss Mary Trueman and other friends this week.

The grading and levelling of the Calgary and Edmonton trail is now pretty well completed. The travelling along the trail is now rapidly going on, and tourists passing here report that where the gravel is completed, the trail is most excellent.

**MR. BOVIN'S DEATH**  
"What shadows we are and what shadows we pursue!" exclaimed Edmund Burke when one of his contemporaries suddenly died at the time of acute political controversy. Death under these circumstances always has an especial poignancy and that of Hon. Geo. Bovin will cause the deepest regret in all parts of the dominion among party friends and opponents alike.

We heard him speak in Edmonton last autumn, when he was there with his chief. To the address which he delivered a warm tribute was paid the next day in these columns. No one could have heard it and not been impressed by the marked ability of Mr. Bovin's last ministerial speech. He came into office under unfortunate circumstances. He had to bear the brunt of the defence of his department but the conditions that were revealed in connection with it had developed long before he assumed the portfolio. From Harward report of Mr. Bovin's address on June 24th last in the debate on the inquiry, the following is an extract:

May I make a few personal references to the minister (Mr. Bovin). He entered the house some fifteen years ago after a brilliant record at the bar, a record which maintained its brilliancy in parliament. So highly was he regarded under the late administration, there being unfortunately no French speaking member in our side of the House, he was entrusted with the duties of deputy speaker. I recall this by way of tribute. I doubt if the chief was ever filled with as great capacity as respects the complete command of the rules of parliament, as was the case with the minister. Certainly in the efficiency of the discharge of that work he never was excelled. There is none more capable and none of a clearer mind.

The loss that public life has sustained in Mr. Bovin's death is no small one.

**Separator For Sale**  
One 24-40 separator, complete with feeder, blower, at a bargain. Can be seen at Morrison and Johnston, Ltd. A snap.

**BINDER FOR SALE**  
Deering 7 binder in good order for sale for \$75.00. Apply F. H. Duckett, Phone R711.

## Machinery for Sale

- 12-24 Waterloo Boy tractor and 22-36 Sawyer-Massey Separator \$985.00.
- 11-22 Sawyer-Massey tractor & 24-36 Sawyer-Massey separator \$1100.00.
- 10-20 Titan tractor & 24-40 Fairbanks separator. Complete \$1150.00.
- 12-24 Huber tractor and 24-40 New Racine separator \$850.00.
- Fordson tractor \$350.00.
- Rumley 12-24 tractor, \$600.00.
- 22-36 Rumley separator \$700.00.
- 26-46 Case separator \$600.00.
- 15 H.P. Case Steamer \$600.00.
- 20 H.P. Case steamer and 28-50 Case separator. Tank, Bunk house, drive belt, complete \$1600.00.

Reasonable terms arranged. Will sell Separators or Tractors separate.

**C. R. Hembury, Lacombe, Alberta**  
Agent: Nichols and Shepard Co., Minneapolis Threshing Machine Co.

**NOTICE**  
Will the party who took Red Cycle Kidde-Kar from W. Avery's track, gate, return and oblige.

**LACOMBE WINS**  
Lacombe Football team won the final game in the Citizen's Cup games, defeating Wood River 2-0.

WORLD HAPPENINGS  
BRIEFLY TOLD

Heavy rains in Western Japan have drowned thirty persons and destroyed about 1,500 houses.

The jewelry left by the late Queen Alexandra has been valued at more than \$6,000,000. It is understood.

It is officially announced that the Duke of York, King George's second son, will visit Australia to open parliament in the new capital, Canberra.

It is reported that the Bill Smith claims on East Bay at Red Lake, have been taken over by the Guggenheim interests of New York. Assays are said to run very high in silver, gold, nickel, and copper.

Joseph A. McLean, former minister of public works in Alberta, has been appointed manager of all the big ranch and farm holdings of the estate of the late George Lane in Alberta. This includes the famous Bar "U" ranch.

Joseph Samuel Barker, vice-president of the Maple Leaf Milling Company, who died in Toronto June 6, left an estate valued at \$234,700, of which one-third consisted of real estate and the rest personally.

The gross earnings of the Canadian National Railway for the week ended July 14, 1926, were \$4,722,000 as compared with \$4,426,722 for the same week of 1925, an increase of \$295,278, or twelve per cent.

Confirmation has been obtained that the Wayagamack Pulp and Paper Company of Canada will take up an option on the island of Anticosti in the Gulf of St. Lawrence, now owned by Senator McLean of Quebec. The purchase price is said to be six million dollars.

The King has approved the appointment of Sir Ronald Lindsay as ambassador at Berlin. Sir Ronald has been ambassador at Constantinople since 1925. His post will be taken over by Sir Geo. Russell-Clerk, minister at Prague.

Viscount Willingdon, who is to succeed Baron Byng as Governor-General of Canada, has been appointed by His Majesty a knight of the grand cross of the order of St. Michael and St. George, the London Gazette announced.

More than 60,000 acres of splendid crops were laid waste when a tornado, accompanied by a hail and rainstorm, swept across the sparsely settled districts of Waldron, Gerald, Atwater and Sky Hill, Sask., killing one and injuring five persons.

Practically as much money has been invested in Alberta Government savings certificates to date this year as for the whole of 1925. The figures for last year, covering the entire twelve months, were \$2,449,515, and to the end of June this year, covering the first half only of 1926, \$2,100,706 had been accounted for.

## The Marquis of Reading

Late Viceroy of India Has Had a Romantic Career.

Forty years ago a full-fledged sailor was sailing up the great Indian river, the Hooghly. On board was a wistful-looking ship's boy polishing the brasses, and doubtless watching the great city unfolding itself to his admiring gaze.

That boy's next visit to India, was in the capacity of viceroy and governor-general, five years ago.

It was in these words that the Earl of Birkenhead recently epitomized the romantic career of the Marquis of Reading, who has returned recently to England on the completion of his term of office.

The new marquis is fond of recalling his experiences of those seafaring days. He claims he learnt more on that than he probably would have done at Oxford. His two years before the mast were followed by a short time on the stock exchange. Afterwards he became a barrister, and in less than ten years was earning £40,000 a year.

Earlier Delivery of Cable Letters. Cable letters to Great Britain, Ireland and Holland will hereafter be delivered on the morning following the date of filing or on such thereafter as their transmission is completed up to one p.m. Greenwich. This information is contained in an announcement received by the Canadian National Telegraph Company, which also states that cable letters will no longer be held until the uniform hour of noon on messages such as these the rates are \$1.10 for the initial 20 words to Great Britain and Ireland and \$1.60 to Holland, excess words costing six and eight cents respectively.

Chinchilla Rabbit Industry. Mr. J. H. C. Palmer, a Vancouver Island fur farmer, who recently spent two months in England making a study of the chinchilla rabbit and the utilization of its fur, has returned with 24 animals, valued at \$1,000, which he has established for breeding purposes on his farm.

What She's Used To. "The internal impropriety" you want to marry my daughter? Do you think you could give her what she's used to?"

The Sutor. "Yes, sir, I've a violent temper myself."

When a man is sick he expects the rest of the family to stop every thing and listen to his groans.

W. N. U. 1629

## Edmonton Given First Locomotive

Engine 103 Presented to City at City Hall by Canadian National Railways to be Placed in Front of New Station

Twenty-one years ago, on November 24, 1905, the first train into Edmonton arrived over the lines of the newly constructed Canadian Northern Railway, and practically the entire population crowded about the station to greet it.

On July 12 many of those who were present 21 years ago mingled with the thousands who cheered Mr. A. Wilcox, of Winnipeg, general superintendent of transportation of Canadian National western lines, as he presented to the city the locomotive that hauled that first passenger train.

A track had been built into the exhibition grounds and over this length of steel engine No. 103 moved under its own steam with Miss Dobbin, the same woman who drove it 21 years ago at the throttle.

As locomotives are judged today, 103 looks decidedly antiquated and few engineers would take it out on the line without proper care. In the history of Edmonton, it symbolizes the commencement of an era of almost unparalleled growth. Because of this it is to be preserved as a link with the days when Edmonton was a small town.

The little engine, that looks scarcely larger than a donkey engine when compared with the steel giants that haul the deluxe transcontinental trains of the Canadian National Railway through Edmonton today, is destined never to go to the scrap heap, but will rest proudly for all time on a polished set of steel rails set in concrete and mounted in the civic center opposite the new Canadian National station now under construction.

## Ultra-Violet Rays

New German Quartz Lamp Has Wonderful Possibilities

A new development in the quartz lamp, which makes it possible to distinguish immediately between animal and mineral matter, has been demonstrated by its manufacturers in Germany.

The new lamp will give merchants a quick and sure means of distinguishing real pearls from those of synthetic manufacture, and will enable them to detect cotton threads in supposedly all-wool goods.

Counterfeit stamps, bonds and paper money can be distinguished from genuine ones by the aid of this light, for the slightest difference in the composition of the paper shows in a difference of color under the ultra-violet light. Exchanges or changes are also clearly detectable.

The lamp test is also applicable to oils, since those manufactured from animal fats or vegetable oils give a fluorescence, while oils of mineral extraction are colorless.

From a cultural standpoint, the lamp also holds out hope that a multitude of manuscripts written on parchment may now be deciphered.

Since parchments are of animal origin and the styria and fluids with which the writing was done were made from minerals, the chemical action resulting is still discernible under the light, even though the first writings were erased with pumice-stone to allow the parchment to be used a second time.

Through the use of this ray has long been recognized, the new invention permits a much more extended use of them.

## Riches of Hudson Bay Area

Vast Mineral Deposits Await Opening of District by Railway

There are rich deposits of galena, lead, silver and zinc in latitude 57 on the Quebec side of Hudson's Bay on the Little Whale River, according to William Brookbank of Swastika, a prospector, who made the statement to a group of Toronto newspaper men recently.

Mr. Brookbank has the distinction of being the first prospector, so far as is known, who has travelled this far into the north in search of lead. That deposits existed in the land has been believed for years. Fifty years ago the Hudson's Bay Company did some work on the Little Whale River, and about 1902, Dr. Low, a Dominion Government geologist, went there and made a report on the district, mentioning galena deposits at Richmond Gulf. But in those days the comparatively low price of lead and the penalty on lead ore, having been long been recognized, the new invention permits a much more extended use of them.

Mr. Brookbank has the distinction of being the first prospector, so far as is known, who has travelled this far into the north in search of lead. That deposits existed in the land has been believed for years. Fifty years ago the Hudson's Bay Company did some work on the Little Whale River, and about 1902, Dr. Low, a Dominion Government geologist, went there and made a report on the district, mentioning galena deposits at Richmond Gulf. But in those days the comparatively low price of lead and the penalty on lead ore, having been long been recognized, the new invention permits a much more extended use of them.

In addition to the report of Dr. Low and the Hudson's Bay Company officials, trappers from time to time have brought out many specimens of pyrite which are to be seen. Mr. Brookbank says, as particularly in Hudson's Bay, but in that region. A number of specimens of ore have been kicking around a store in Cochrane for years and it was there that eventually met William Brookbank in the far north.

"Why do churches take up collect money?"

"Need funds, I guess."

"Not at all! They don't want to make people good for nothing."

A French physician announces his discovery of a serum for the cure of poisonous mushrooms.

Some spider webs are so strong that birds can be caught in them.

## Success of Wheat Pools

Projected Total, \$50,000,000 Bushels Will Be Marketed Through Pool This Year

D. L. Smith, assistant manager of the Canadian Co-operative Wheat Producers, Limited, the selling agency of the three private wheat pools, described now 127,000 Canadian bushels of wheat as successfully finding profitable markets for grain. He spoke before the American Institute of Co-operative Wheat Producers in session at St. Paul.

Mr. Smith predicted that the wheat pool would market approximately \$50,000,000 bushels of all grains this year.

After describing in detail the methods of pool marketing and the facilities at the disposal of the wheat pool, he said:

"We did not rush into the export business immediately after the pool started its functions. In our first year's operation, we sold direct only about forty per cent. of our handling of \$50,000,000 bushels. This year, however, we will have exported close to 75 per cent. of the whole amount under contract to us."

Due to the success of the wheat pools, he said, Western Canada is more prosperous today than it has been in years.

## Slavery in the Congo

Belgian Public Opinion Ready to Hear Plain Truth About Conditions

Enlightened Belgian opinion with the King and Crown Prince taking the lead, appears ready to hear many plain truths regarding exploitation of the colored races when the international conference on the Christian mission in Africa assembled at Le Zout, Belgium, Sept. 14. Many Protestant missionaries will be in attendance and they can be counted on to deal faithfully with the various colonial administrations.

In return, the British, French, and Portuguese missionaries will be invited to hear equally searching evidence regarding their policies and those of their governments. The King of the Belgians says: "The Congo and its inhabitants have produced largely and brought much money to the home country. Let us never forget that colonization must find its justification in the moral progress and material welfare of the native population. Is not this moral and material progress the necessary condition of the future output of colonial undertakings? We have a moral responsibility towards the native populations whose government we have assumed."

The Soviet council of work and defence, according to the Moscow Tass, has ordered that the procedure by which foreign gold prospectors may enter Russia be greatly simplified.

Permits to applicants are to cost only 3 gold rubles (\$1.50). The applicants must prove their proletarian origin before receiving visas. Persons who have more than a grammar school education are not permitted to prospect for Siberian gold. Other visas indicate that the Soviet Government does not intend to allow anyone to accumulate wealth in the Russian gold fields. Foreigners must agree to work under Soviet laws, which limit the amount of gold which may be carried away.

The official signs will warn motorists of dangerous curves and grades. All persons whose cars must stop before entering a main highway under the new government highway regulations will be clearly marked in this way. Railway crossings where motor buses must come to a full stop before proceeding, also will be marked.

British Columbia Soon to Have Motor Roads Well Marked

Every important road in British Columbia will soon be marked for the convenience of travellers with official warning signs. These signs are under preparation and will be turned out in thousands shortly for installation all over the province.

The official signs will warn motorists of dangerous curves and grades. All persons whose cars must stop before entering a main highway under the new government highway regulations will be clearly marked in this way. Railway crossings where motor buses must come to a full stop before proceeding, also will be marked.

Alberta Premier Coal Producer

Largest Tonnage of Coal in Canada Mined in Alberta

During 1925, Canada produced some 13,194,983 tons of coal, valued at \$49,203,897, according to a report issued by the Dominion bureau of statistics. Alberta held the premier position with an output of 5,389,021 tons, which was 79,302 tons above 1924 production. British Columbia showed a slight advance of 5,412,352 tons in 1925.

There were 25,032 people, including 1,542 salaried employees, engaged in or about the mines during 1925, to whom \$3,200,309 was paid in salaries and wages.

A sign over a garage in a small western town reads as follows: "Use genuine parts. No substitutes are as good. Ask the man with a wooden leg."

A microphone has been invented in England which so magnifies the ticking of a watch that it sounds like the explosion of a gasoline engine.

## Descendant of Governor

Duke Dmitri, of Leuchtenberg, Count de Boutharnet, Grand descendant of Charles, Marquis de Boutharnet, who governed Canada in the name of the French King Louis XV. between 1736 and 1747, is visiting for the first time the country in which his ancestor made his history. He is joining his cousin the Marquis d'Albion in a thirty-day tour of the Canadian Rockies and is taking part with him in the grand Pow-Wow held at the Pailman Valley in August. His travels from Cherbourg on the Canadian Pacific liner Melita and travelled C.P.R. across Canada. Coming down the St. Lawrence he was deeply interested in the province of Quebec with which he is historically connected, and passing through Fort William he had another reminder of the days, nearly two hundred years ago when La Verendrye founded the city under the auspices of the Marquis de Boutharnet. His family still keeps a highly interesting letter written "to Such, in effect, has been the fate of the collection. After Von Ferra's death, which occurred in Switzerland during the Great War and that the treasures he had spent a lifetime in gathering would be scattered to the four winds.

## Remarkable Stamp Collection

Sale of Rare Old Stamps Will Help to Pay French War Debt

They collect of paper collected and treasured by a queer old man—scraps of the sort that people the world over throw away by the million each day—are helping France to weather her financial storm. More than 50,000,000 francs is the sum realized to date from the sale of a single collection of postage stamps.

Philatelists and others in many countries are watching with amazement the sale of the Von Ferra collection in Paris. This remarkable assemblage of high-class postal art, engravings and lithographs was collected in the war by the French Government. Single stamps valued at hundreds of thousands of francs are still to be sold.

One stamp recently passed into a private collection, bought for 500 francs, at the current rate of exchange, about \$32.00. It was a 1-cent stamp of British Guiana, issued in 1856, the only one known to be in existence today.

The buyer was Arthur Hirsch, a collector of Ulster, N.Y.

Unquestionably the Von Ferra collection was the most famous and romantic in the world. Back of the sale lies the strange story of an aged recluse whose hobby made him widely known even though he tried throughout his life to avoid the limelight.

Great was the pride he must have felt in the knowledge that his collection was incomparable; he died with out knowing that his plans for its disposal would be shattered through the Great War and that the treasures he had spent a lifetime in gathering would be scattered to the four winds.

Such, in effect, has been the fate of the collection. After Von Ferra's death, which occurred in Switzerland during the Great War and that the treasures he had spent a lifetime in gathering would be scattered to the four winds.

#### CHAPTER X.—(Continued)

Joanna laughed gaily with him. "Fancy things to look forward to golden weddings, aren't they?" he bawled, looking down at her quickly.

"Fancy you, now, getting through the marriage stages fast enough to leave time for an anniversary like that!"

"Oh, I shan't be so quick to get married that I'll be likely to change my mind," Joanna retorted.

"Now that's a sensible resolve," Kenilworth agreed. She felt his arm tightening a bit. He was bawling her closer than Brandon had, almost as close as her own dancing boy's customarily did. She began to wonder much about him. She had thought, him old, much too old, but he danced with her and talked to her on the level of every young man. She had observed earlier in the evening that most of the men around the table appeared to be much older than their women. But she reflected, they seemed to be men who had a place in life and, so, were more worthwhile than inconsequential younger men. And she rather liked the change. Her companion was still talking to her as he swung her deftly in and out among the dancers on the well crowded floor.

"An exquisite flower like you, you and your happy kind—is much more attractive when you don't get on being exclusively worn in one coat label. I shouldn't say half the things I feel I mean if I thought you'd be adding them up into a matrimonial sum. You'll find life is all too short for that sort of thing."

Joanna looked at him queerly. "I ought to say something to that," she announced, "but I'm not sure just what. It'll probably come to me in the middle of the night and then I'll know I'm a dummie!"

"I shall supply your comments now, and spare your slumbers," he returned. "I don't like that dummie! You should say: 'Sit at my feet, sir, and speak freely of pleasant things. They shall enter one ear and depart not from the other!'"

"Your deliveries will have to be better than your samples or they won't even get into the first ear," she promised. "I thought we had decided to talk about Yvonne, and the husband. Why did she divorce him? He had to marry him at all! I've

## AVOIDED AN OPERATION

Mrs. Dayman Gives Lydia E. Pinkham's Vegetable Compound the Credit

Colborne, Ontario.—"When I was first married I was very thin. The doctor said I was weak and would never be able to have a child, but I did, and from the time my baby came I suffered all the time and doctors said I could never have a child. Life became a burden, and doctors said an operation could help me, but my husband was opposed to that. I had seen Lydia E. Pinkham's medicine advertised, so I told my husband that I thought I would try it, that I might get some relief."

"I had not taken one bottle when I could feel it helping me. I took five bottles and had better health. Now I have three girls and a boy and have done my work up to confinement. I am now at the change of life and owe my good health to Lydia E. Pinkham's Vegetable Compound. I take a bottle when I think I need it."

—Mrs. SUSAN DAYMAN, R. R. No. 5, Colborne, Ontario.

Sold by druggists everywhere.

W. N. O. 1640

for your friends to estimate and your rivals to envy. You may as well begin now, I make my confession. I promised to surrender you with my emotions. But you must assure the company that I did not begin by paying you compliments."

"I have heard," Brandon remarked, "that Roddy never compliments a woman. A dose of his vitriol has assured me that he detests his love first and then tells them why. His reasons are, therefore, accepted as being truthful statements of fact, and not flatteries. A woman doesn't class what is said of her by a man who is in love with her as flattery. She believes it to be a just intensity of her perceptions."

"Clever, that!" Yvonne declared. "I prove what I've always contended—that a man ought to have a style of his own. It's positively gruesome to flatter to meet men so sentimental."

"What weary hours you must spend!" Kenilworth exclaimed. "I promise you complete relaxation if you will take a turn on the floor with me. Miss Manmore, here, is dying to ask Brandon what sort of a class I am, and to ask him who you're planning to marry next."

"A cocktail, first," she demanded. A waiter, to whom Kenilworth had entrusted a pair of silver-bells, responded to his signal. Joanna had returned a previous offering and had not been pressed. This time Brandon quietly reached across the table and turned up her glasses.

When Yvonne, with a nod to her, had moved away for her dance with Kenilworth, Joanna turned to Brandon eagerly. "He seemed to read just what I was thinking," she said. "Tell me about him—and Yvonne, too. I never dreamed that some day I would know her. You see she has been one of those interesting people we talk about just to prove that we keep up with the news."

(To be continued)

### Etiquette of the Flag

Canada Only Asks Courtesy From Her

The action of the American Automobile Association in issuing a widespread warning to United States people regarding the visit of Canada to avoid a needless flaunting of the United States flag in this country, will be appreciated by Canadians generally. We are a mild-mannered people, and we are always glad to see our American cousins, yet it must be admitted that when a motor car makes its appearance with the Stars and Stripes conspicuously displayed and no sign of a Union Jack, we are upset and resentful.

The A.A.A. puts whole thing in a nutshell. "Something more than courtesy to a friendly and hospitable people is involved," says the association's warning. "It is one of the best established and oldest rules of international conduct that when you fly your flag in a foreign country you should fly it only with the flag of the nation whose guest you are and under whose protection you are travelling."

That is all that we ever here ask of our friends from across the border. Fly your flag if you like; but fly the Union Jack with it—Peterborough Examiner.

### Brings Substantial Income

Missouri Woman Makes Good Living Selling Butterflies

Income from the sale of moths and butterflies has helped Mrs. Edith D. DeCoster, of Buckfield, Missouri, to educate her three daughters and take a year's vacation in California. It began with the finding of a caterpillar in the garden by her daughter, which gave her the idea. She has sold tens of thousands of moths, butterflies and cocoons to teachers and naturalists.

It testifies for itself, "Dr. Thomas' Electric Oil needs no testimonial of its powers other than itself. Whoever tries it for colds or colds, for cuts or contusions, for sprains or burns, for pains in the limbs or body, will know that it cures and proves itself and needs no guarantee. This shows why this Oil is in general use."

### Cost of Coal Strike

The coal strike in Great Britain and the recent general strike cost the duties of the nation about £150,000,000 according to Arthur B. Samuels, parliamentary secretary for the overseas trade department. Mr. Samuels, replying to a question in the house, said that his estimate included a loss of £10,000,000 to the mining industry.

### Largest Skyscraper

The largest skyscraper in the world, to be erected in Rome as a monument to the Fascist regime, is the project of an Italian-Argentine architect. He was recently given a private audience with the pope, who was especially interested in the plan to place a church at the top of the great building, 500 feet above the street.

"Your wife's very broad-minded, isn't she?"

"Oh, yes. She always believes there are two sides to a question—her own and her mother's."

The day to pick your wife is Choo-day. Wednesdays are the day to be married on, of course.

Sheep could be produced for fourpence in England in the 12th century.

### Money By Wireless

Cheque Recently Wirelessly Photographically From London  
The Bank of Montreal, of New York, recently received a cheque for \$200 that was wirelessly photographed from London.

It was one of a series of tests applied to the process of transmitting radiophotographs, invented by Captain R. H. Hedges, and provided the most commercial possibilities of radiophotography.

The transmission is executed automatically. A photographic negative is placed in a glass cylinder. An electric transmitting circuit is effected by a strong light, which from the inside pierces the cylinder, projecting the light and shadows of the picture into a moving camera box containing a photo-electric cell.

The cylinder moves and the photo-electric cell operates the ordinary wireless telegraph circuit. The radiotelephone is placed at the receiving station in the brief time in which it takes the electric signals to travel.

### Millions Await Claimant

Heir to Millions in London Bank Not Yet Discovered

Lying in a London bank is a sum approaching \$35,000,000, amassed romantically by a priest, and now awaiting somebody who will establish a claim to it, by some day, and begin the life of a multi-millionaire.

Several people are pursuing claim to this fortune, among them a widow, who claims to be a cousin of the millionaire priest. Two men named Franklin and Jeter are in London on behalf of the widow's claimant. Somewhere in the world is a person living today on small means who is really a multi-millionaire without knowing it!

The unclaimed fortune in a London bank amounts to over \$35,000,000. At the moment this vast sum is literally going begging.

About forty families have laid claim to it, and so far none of these supposed heirs have satisfactorily proved their identity.

### Merchant Was Good Sport

Escape Ridicule of Small Town by Clever Idea  
How to come out smiling from a bad loss is suggested by Edgar A. Guest in the American Magazine. A merchant in a small town ran for office and was overwhelmingly defeated. He polled so few votes that he appeared ridiculous. He was in danger of being laughed at. "But," says Mr. Guest, "the merchant was a good sport. He beat the town to it. The morning after the election he put his sign in his window: '\$25 reward for the name of the man who can take that vote for me.' Everybody saw it and laughed. But they laughed with him, and not at him."—The Outlook.

### Complantes Commercial Center

Ex-King of Greece May Enter Trade

Ex-King of Greece, who with his wife is now visiting London, is said to be contemplating a commercial career.

When he was forced to abdicate a few years ago by the Greek revolutionaries he was promised an annuity which has not been forthcoming.

The ex-Queen is a daughter of the Queen of Rumania. The ex-King was educated in England.

### Wealth in the West

The three prairie provinces comprise an area valued at approximately \$1,815,508,000, according to the estimation. The value of this land has increased by \$56,618,000 during the past five years, according to the Dominion Government estimate. In the manufacturing industries of this area alone approximately \$50,000,000 is distributed annually, the total having increased materially during the past few years.

### Eat More Eggs

The time of year is approaching when the price of eggs starts downward. When eggs are cheap they should be one of the staple foods in every household. For children, eggs are much better than meat. The protein in eggs is in a very easily digested form.

Some people never accomplish anything because they have too much patience with themselves.

### Relieve Irritations By Using Cuticura

Relieve the affected parts freely with Cuticura Soap and hot water, dry without rubbing; then apply Cuticura Ointment. For eczema, rashes, itching, irritations, etc., they are wonderful. Use Cuticura Soap daily to keep your skin clear. They are sold by all druggists.

### Polish Engineering Project

Hope to Unite Black and Baltic Seas Through the Rivers of Poland

A special League of Nations committee, on which there are several engineers, including an American, Mr. Laza, is to investigate the possibility of uniting the Black and Baltic seas through the rivers of Poland.

The Poles are hopeful that Great Britain will finance such a project which will necessitate the construction of several canals, so that Polish coal may be shipped southward and no longer compete with England for the northern markets.

Polish coal has been making heavy inroads in those centres, in view of the British coal strike.

### Seals Sink Boat

Power Launch Sinks When Fifteen Seals Climb Aboard

Seals looking for a place to sun themselves are playing havoc with small boats off Santa Monica, Cal. Attracted to the bay in unusually large numbers by good fishing, the seals have filled to find rocks upon which to sun and so have taken to the small craft anchored a short distance off shore.

A 22-foot power launch sank after a number of the animals, many of them weighing more than a human being, climbed aboard. Two other vessels were almost sunk before the seals were driven away.

### WOMEN OF MIDDLE AGE

Need Rich, Red Blood to Maintain Good Health

After passing the age of forty every woman has reason to grow anxious about her health. This is due to the fact that her blood is becoming thin, with its attacks of faintness and fits of depression. Its often violent headaches and back aches are rightly dreaded by women; but if reasonable steps are taken to safeguard the health, no serious ailment will arise. At this turning point in life Dr. Williams' Pink Pills have given a helping hand to thousands of suffering women who were fighting a hopeless battle against poor health and wasting strength.

The very best help for any woman of middle age is the health help given by Dr. Williams' Pink Pills. These pills reinforce the blood supply, enrich and purify it. In doing this they nourish the starved and overtaxed nerves and give new strength and vitality to the whole system. By this natural process Dr. Williams' Pink Pills completely dispel all pains and weakness, and a better, happier condition of health and spirits arises.

Every woman of middle age should take advantage now of the wonderful health-help of Dr. Williams' Pink Pills. They are sold by all medicine dealers or will be sent by mail at 50 cents a box by The Dr. Williams' Medicine Co., Brockville, Ont.

### University of Saskatchewan

1,977 Students Enrolled At University During Past Year

The total enrollment at the University of Saskatchewan in the past year was 1,977, an increase of over 29 per cent as compared with the previous year, whilst the extension department reached over 20,000 persons, an increase of over 40 per cent. This year approximately 110 degrees will be conferred and 20 certificates granted to those who have completed courses in agriculture and pharmacy. This brings the total number of degrees which have been conferred since 1912 up to 1,006 and of certificates 456, a notable record for the first fifteen years of the university's history.

### Attendance Records Shattered

All attendance records of the Calgary exhibition were shattered during the annual summer and exhibition held from July 5 to 16, 1924. Visitors passed through the gates. Attendance has been steadily increasing year by year, but the difference between this year and last is close to twenty thousand, while the increase since the 1922 exhibition was 5,444. In addition to creating a splendid record for the number of visitors at the event, the management is convinced that the 1924 exhibition and stampede is the best ever staged in the city of the foothills.

Mother: Come, Billy, it is long past the time for you to get up.

Billy: Well, mother, hadn't I better stay in bed until the time comes round again?

Secret societies evidently originated in Egypt. Mummies the word there.

Did you ever see an office holder who had a retiring disposition?

### Without A Hat

Member in British House of Commons In Awkward Predicament

"Is a handkerchief a hat?" This question raised a difficult point in procedure in the British House of Commons. According to the rules, a member who wishes to raise a point of order when a division is called must wear a hat to do so.

Mr. Tom Griffiths (Soc. Party), wanted to raise a point of order after a division had been called on one of the clauses of the Finance bill. He was without a hat. In desperation he rolled up an order paper into a sort of dunce's cap and fitted it on. This would not do.

Then another Socialist produced a handkerchief, knotted it at the corners, and put it on Mr. Griffiths' head. Under this quaint covering he again rose to address the chair with a long protest. Members roared with laughter.

Mr. Churchill shouted out: "That is not a hat within the meaning of the act!"

The deputy chairman of committee, Capt. Fitzroy, regarded him with interest. He decided, however, that a handkerchief is not a hat, and after Mr. Griffiths had finished, he did not reply to his points, but called the division.

### The Death Of Wolfe

Discussion Has Arisen Over Authenticity of Painting at Oxford Museum

Canadian readers will be interested in the fact that a distinguished artillery officer has been telling me, that the picture of the death of Wolfe, painted by Edward Penny in the Ashmolean Museum of Oxford, is incorrect, whereas a copy of it in the Royal United States Services Institution is accurate.

In the original the surgeon's mate is shown in mott, and in the copy he is in uniform. Again, the original does not show Mr. Wolfe (friend, Holland, who was present at his death, whereas the copy does. I wonder if any of my readers can throw light upon this problem?—London Graphic.

### Large Appetites

Average Person Consumes One Thousand Pounds of Food in a Year

Averaging the adult and large-catt, it requires 1,000 pounds of food per person to maintain him a year. The average person will eat, in that time, 120 pounds of meat and fish, 378 pounds of breadstuffs, a similar amount of potatoes, vegetables and fruits, and some 20 pounds of butter and cheese. There are some 1,500,000,000 people in the world and 100,000,000 of them produce the food for the entire number.

### Little Helps For This Week

But why dost thou judge thy brother?—Rom. xiv, 10.

The glance that doth thy neighbor doubt.

Turn thou, O man, within. And see if it will not bring out Some unsuspected sin.

To hide from shame the branded brow, Make broad thy charity. And judge no man except as thou.

Wouldst have him judge of thee. —Alice Cary.

Such as everyone is inwardly, so he judgeth outwardly.—Thomas A. Kempster.

What man can judge his neighbor right, save whose love makes him refuse to judge him?—George MacDonald.

Mothers Value this Oil.—Mothers who know how suddenly croup may seize their children and how necessary prompt action is in applying relief, always keep at hand a supply of Dr. Thomas' Electric Oil, because experience has taught them that this is an excellent preparation for the treatment of the ailment. And they are wise, for its various uses render it a valuable medicine.

### Ban U. S. Jazz Leader

Premier Baldwin's policy of safeguarding home industries, is authoritatively stated, is behind the exclusion from England of Ben Bernie, jazz orchestra leader from the United States, who has been denied a permit for an eight weeks' engagement.

The world's supply of balsam of Peru, used in perfumes and medicines, all comes from a remote grove of trees in Central America, known as the Balsam Coast.

**Don't forget**

**Borden's ST. CHARLES**  
EVAPORATED MILK

More milk means better health. Have it handy and use it in cooking

Use it wherever the recipe calls for milk

### Edison Dislikes Painted Portraits

Believes Pictures Not Good Unless Mechanism is Used

Thomas A. Edison's love of machinery is displayed even in his attitude toward pictures of himself. Sir John Lavery, the English portrait painter, who spent several weeks in the United States painting Pittsburgh millionaires and other persons, has told of how he tried to persuade the famous inventor to pose for a portrait, after Mr. Edison had painted one of Mrs. Edison.

Sir John said Mr. Edison refused, asserting he was opposed to painted portraits because they were made without the aid of mechanism and therefore could not be "really very good."

"Everything in this world should be done by machinery and measurements," Sir John quoted the electrical wizard as saying.

Miller's Worm Powders are a pleasant medicine for worm-infested children, and they will take it without objection. When directions are followed it will not injure the most delicate child, as there is nothing of any injurious nature in its composition. They will speedily rid a child of worms and restore the health of the little sufferer whose vitality has become impaired by the attacks of these intestinal pests.

A passenger liner plying between Seattle and the Far East publishes a paper in Chinese for the benefit of the Chinese passengers.

A date palm, near San Diego, was planted by the missionary, Junipero Serra in 1776.

All men are not houseless, but some men are home less than they should be.

## Hundreds Visit the Experimental Farm

And Spend an Interesting and Instruc-  
tive Afternoon at This Grand  
Institution

Over five hundred business and professional men from the length and breadth of Central Alberta accepted the invitation of Supt. Reed on Wednesday afternoon and paid a visit to the Government Experimental Station here. The farm at this time of the year is at its best, and the large crowd were most interestingly entertained by Mr. Reed and his staff. The various experimental plots were visited and their objects explained by the men in charge of the various departments of the station. The flowers and shrubbery in the drives throughout the farm were greatly admired and were an object lesson to every one desirous of making their own residences and surroundings beautiful with little expense or trouble.

The Dominion Experimental Station at Lacombe, is one of the beauty spots of Alberta and is visited by hundreds of tourists every year who en route along the Calgary and Edmonton trail visit the station which is alongside of the trail about a mile South of the town. The visitors from afar are surprised and awed by the abundance and variety of the crops grown here. They are amazed by the profusion of flowers which meet their eyes as they tour slowly along the gravelled drives. They visit the fields and gardens, see the livestock and poultry and realize the possibilities of the country. After passing the miles of border shrubs, berry bushes and lawns, they are convinced that in a few years Alberta will be a land of beautiful homes, and a more beautiful landscape.

On the field day that was held here to-day, a special invitation was extended to the business and professional men of Central Alberta, who hitherto were all too slack in their appreciation of the work done by the Dominion Station. But who responded en masse and spent the afternoon with Mr. Reed and his assistants.

The programme was opened by an address of welcome by Supt. Reed, who also outlined the drive that was to follow. Dan E. A. Howes of the University of Alberta was the first speaker and he referred to the work being done by the Province and the Dominion in their various Experimental Stations and Agricultural Schools, and stressed the point that the term "Farm" is greatly misused in regard to these places, they being as it were really "Out-of-door Labora-

ories" where extensive experiments with live stock, field and grain crops flowers and shrubs were conducted in order that the farmer and stock breeder may be supplied with information that will assist him in getting results from his labour and money invested.

Hon. Irene Parby, minister without portfolio, in the Alberta house, gave a brief address of congratulation to Mr. Reed on the splendid appearance of the Station. She stressed the importance played by the flower gardens and pleasant surroundings in the building of Alberta farm homes.

L. H. Newman, Dominion Cerealist, Ottawa, gave a most interesting talk on the originating of new varieties of cereal grains. He discussed the history of the "Marquis" wheat, world famous grain, which did much to making Canada the greatest wheat producing country on earth. The "Marquis" variety was a result of crossing "Red Fife" with an Indian variety.

As an indication of the time required to perfect a new variety he stated that the original cross in connection with the origin of Garnet wheat was made as early as 1892. "Garnet" is a new variety of wheat recently introduced by the Dominion Experimental Farms where it has been tested for a number of years on all the branch Stations throughout the Dominion. Dealing with practical value of Marquis wheat to the farmers of Alberta, Mr. Newman stated that the average increase in yield over Red Fife, one of its parents and the variety previously grown in the west, over a long period of years was five bushels per acre, a conservative estimate. He further stated that Alberta produced annually six million acres of wheat of which approximately 90 p.c. or 5,400,000 acres are Marquis. With an average increase in yield resulting from this new variety of five bushels per acre, the total increased production of wheat on Alberta farms is 27 millions of bushels over and above the annual production had Red Fife only been grown. It is obvious to the reader that such an annual increase in yield due entirely to the introduction of Marquis wheat means annually to the farmers of Alberta an increase of cash returns of \$27,000,000 when wheat is \$1.00 per bushel, or, at today's price, \$1.40, the increased revenue to Alberta farmers alone would be \$37,800,000 per year, due en-

tirely to increased yields resulting from the introduction by the Dominion Experimental Farms of an improved and higher yielding variety "Marquis", a name large enough to maintain the Dominion Experimental Farm system throughout Canada for a period of twenty five years or more. A trip through the experimental plots gave the guests an opportunity to inspect the 4,000 plots devoted to the testing and perfecting of some 100 varieties of wheat, 80 varieties of oats and 45 varieties of barley. In addition to these over 2,000 selections of pure line wheat, oats and barley gave the visitors a first hand insight into the very extensive field work that is being carried on at the Dominion Experimental Station, at Lacombe.

"Live Stock"  
A brief inspection was made of some of the prize-winning Aberdeen-Angus and Holstein cattle, Shire and Clydesdale horses, Yorkshire, Tamworth and Berkshire swine and White Wyandotte poultry, all of which are bred at the station. It was pointed out that herds, studs and flocks are maintained for the purpose of conducting experimental, feeding and breeding trials respecting the various problems met in animal production and for the purpose of supplying pure bred foundation stock, particularly good sires to farmers at reasonable prices. Owing to the limited time it was impossible to discuss any of the details in connection with the many feeding trials that have been and are being conducted with live stock.

## Bishop Pinkham Has Retired

To Members of the Church of England, in Canada, in the Diocese of Calgary

My Dear Church People:  
It is with a feeling of deep sadness that I write this, my Valedictory, after thirty-nine years of very happy life among you.

For some time I have known that I could not depend upon my mental powers, and that I ought to give place to a younger man, since I am in my eighty-second year. On the other hand, it seemed hard to give up, when in every part of the Diocese, there were friends waiting to give me a hearty welcome; bidding me go on, and making me realize that to resign meant for me the hardest wrench possible. I have, however, much to thank God for; and your ever loyal and loving devotion, shown through all my episcopate, cheer and encourage me when resigning; and make me feel that you may make the greatest claim upon my time and thought while I am here on earth, and that increasing prayer for you all will be a duty and a privilege.

I am under the greatest obligations to Archbishop Hayes. He has been one of the truest and sincerest of friends, and fellow workers, who has

rendered me invaluable service in my declining years.  
I have no words with which to express my deep gratitude to those, who, in their kind thoughtfulness, have helped to provide for me, and mine.  
Finally, Brethren: "Whatever things are true; whatever things are honorable; whatever things are just; whatever things are lovely; whatever things are of good report; if there be any virtue, and if there be any praise, think on these things." I am,  
Faithfully and lovingly yours,  
W. Cyrrian Pinkham, Bishop
